Research Interests

My research efforts focus on applied cognitive and social psychology, particularly in the domain of psychology and law. Within this area, I have concentrated on two topics: how juries make decisions and the reliability of eyewitness memory. My third area of focus is in applying decision making principles to everyday judgment tasks, as in medical decision making and distributive justice. Thus, the majority of my research is interdisciplinary, integrating cognitive and social psychology with related approaches from law, political science, and sociology.

Jury decision making

Research methods, such as mock juror sample and trial presentation medium

Comprehension of expert testimony

Awarding of damages

Perception of identification and informant witnesses

Eyewitness memory

Meta-analysis of eyewitness identification and face recognition literatures

Relationship between confidence and accuracy in eyewitness memory

Effect of emotion on eyewitness memory

History of eyewitness research

Everyday judgment and decision making

Making medical decisions

Distributive and procedural justice

Teaching Interests

Undergraduate

My primary teaching interests are in cognitive psychology, both broadly defined and on specific topics. I also enjoy teaching undergraduate courses on the history of psychology and introductory and experimental psychology. In addition, I have supervised 18 Undergraduate Honors theses and numerous independent research projects, and I administered the LSU psychology department's undergraduate honors program.

My overall course evaluations in undergraduate classes have averaged around 6.0 on a 7-point scale. My teaching efforts were recognized in 1996, 1997, and 1998 with nominations for Louisiana State University Outstanding Teaching Awards. In 1999 I received the LSU Psychology Department Outstanding Teacher Award, and in 2003 I was recognized by the UNL Parents Association and Teaching Council for my Contributions to Students.

Courses taught: Introductory Psychology, Human Memory, History of Psychology, Advanced Experimental Methods

Graduate

I have developed and taught several seminars that are cross-listed in the UNL law college and psychology department: psychology and law, jury decision making, religion at trial, and eyewitness testimony. Additional psychology graduate courses include thinking and decision making, history of psychology, and memory research from a historical perspective. In addition, I have supervised (or am supervising) a number of masters theses and doctoral dissertations (see last page of vita for a list of students supervised). I have served on numerous graduate student committees at the master's and doctoral level, in both various areas of psychology and other departments (e.g., education, sociology, marketing).

My overall graduate course evaluations have been consistently high (based on different scales as well as written feedback). I received the American Psychology-Law Society Outstanding Teaching and Mentoring Award in 2011.

Courses taught (some cross-listed at the UNL Law College): Psychology and Law, Decision Making, Eyewitness Memory, Memory from a Historical Perspective, History of Psychology, Jury Decision Making, Damage Awards, and Religion's Role at Trial.

Fellowships and HonorsResearch
